Photographic Safaris

Photo Safaris are undertaken in safari vehicles and/ or by guided hiking trails.

Gamagara Game Ranch is home to more than 28 big game species and more than 200 bird species. Sightings of rare animals, including pangolin, armadillo, armadillo and the elusive black footed cat are common.

We also offer night drives with a 4 x 4 and spotlights, which gives a complete different perspective on nocturnal animals and birds, not to mention the rich insect and reptile life of this unique part of Africa.

Photographic safaris are not bonded to a specific season, although our summertime is recommended.

We can tailor make your photo safari with regional extras, e.g. reserves, parks etc. or you can pay the acquired daily rates.
